

SEMINAR

Under the High sponsoring of the UNESCO

Organized in cooperation with the General Council of the energy and the technologies (CGIET) and with the support of the Association PACTE (Forward plannings and Community actions for the Technologies and the Ethics)

“Converging technologies: goals and perspectives”

8 June 2010 – From 8.30 to 17.45

Conservatoire National des Arts et Métiers (CNAM)

292 rue Saint-Martin – 75003 Paris

The converging technologies bring altogether: Nano-Bio-Information technologies and Cognitive sciences (NBIC).

“They need to identify a sustainable trust in research activities moving in a frame as large as fuzzy. Elaborating trust is necessary to carry on Research and Innovation in this rapidly moving domain” (B. De Montluc 2010).
